Pain is a sign that tissue in your body is being damaged. There is no glory in having a “**high pain threshold**”, it merely means that you are allowing the damage to progress. If you have been experiencing pain for some time, call me now so we can figure out what you need to do to correct your problem. After I speak with you for a while, I can usually determine what is wrong with you, if you need an examination, what tests, if any, you may need and most importantly, if what I have to offer is what you need. If I feel you are better off with another type of doctor, I'll advise you who (what other type of specialist) I think you should see. ~ Dr. K

Procrastination is something best put off until tomorrow.
~Gerald Vaughan

Dr. Kukurin has been answering patients health care questions through his innovative **Ask-the-Doctor** program since 1986. Many patients find answers to their health problems through a friendly chat with Dr. Kukurin. Other beneficial health tips are contained in our free newsletter. Call to take advantage of these wonderful programs. Compliments of *Kukurin Chiropractic Network!*

Putting off an easy thing makes it hard. Putting off a hard thing makes it impossible. ~George Claude Lorimer

If you are in pain and want to be seen right away, call us, we reserve a limited number of appointments for emergencies!

How it works. Just call our office at 623-547-4727 and tell us you want the next available phone consultation with Dr. Kukurin. Let us know what conditions you want to discuss. We'll set up a mutually convenient time when Dr. Kukurin can call you back. He'll discuss your symptoms with you.

He'll tell you what he thinks may be the *cause* of your problems and offer some recommendations to you based on your conversation. There is no cost or obligation for this consultation. But because of the high demand for his time, only two consultations are available per week, on a first call - first served basis.
